General Information

The 8th International Symposium of Pesticides in Food and the Environment in Mediterranean Countries and MGPR Annual Meeting will be held in Cappadocia / TURKEY on September 12-14, 2013.

This Symposium is organized every two years in different member country of the Mediterranean Group of Pesticide Research (MGPR). The society aims to contribute to the progress of research on pesticides in food and environment, to promote the collaboration between scientists of this field and to spread correct information on risk for man and environment that the use of pesticides may cause.

The scientists interested in pesticides, food and environment are kindly invited to participate 8th MGPR International Symposium.

Cappadocia

The simplest definition of Cappadocia for encyclopedia is "Land of Beautiful Horses". For people who are keen on nature, Cappadocia is "Brilliant Nature". According to UNESCO's description, Cappadocia is one of the world's most important protection areas. For historian definitions, Cappadocia is a "Treasure". Lastly, for the lucky guests having spent on a few days at least in Cappadocia, it is a "Paradise". Cappadocia is a place that history and nature have been blended in perfect proportions. While geographic events were creating Fairy Chimneys, people built houses within these Fairy Chimneys through carving out them in these historical processes. Traces of thousands of years of civilizations have been moved to today by the means these builds which were decorated with frescoes. Written history of Cappadocia in which settlements of people extend from Paleolithic period begins with the Hittites. Throughout history, Cappadocia containing trade colonies and being commercial and social bridges between countries is one of the important junctions for Silk Road. Cappadocia is one of the most important historical heritages of Anatolia.
